LIJUN WU

(+86) 15901525751 apeterswu@gmail.com https://apeterswu.github.io
Tower 2, Microsoft Research Asia, No. 5, Danling St., Haidian, Beijing, China, 100080

EDUCATION

Sun Yat-Sen University *Sep. 2015 to Jun. 2020 (expected)*
Ph.D. in Computer Science and Technology⋄ Joint Ph.D. Program with Microsoft Research Asia
School of Data and Computer Science
Ph.D. Supervisor: Tie-Yan Liu and Jianhuang Lai

Sun Yat-Sen University *Sep. 2011 to Jun. 2015*
B.S. in Computer Science and Technology
School of Information Science and Technology

RESEARCH INTERESTS

- **Sequence Prediction**: *Focusing on techniques to improve the sequence-to-sequence models.*
- **Neural Machine Translation**: *Focusing on new structures, algorithms, data and loss functions..*
- **Reinforcement Learning**: *Focusing on DRL techniques to various NLP applications..*

PUBLICATIONS

- **Lijun Wu**, Yiren Wang, Yingce Xia, Fei Tian, Fei Gao, Tao Qin, Tie-Yan Liu, Depth Growing for Neural Machine Translation. In *57th Annual Meeting of the Association for Computational Linguistics* (ACL-2019).

PREPRINTS & SUBMISSIONS

- **Lijun Wu**, Jinhua Zhu, Di He, Fei Gao, Xu Tan, Tao Qin, Tie-Yan Liu, Machine Translation with Weakly Paired Bilingual Documents (In submission).
- **Lijun Wu**, Yiren Wang, Yingce Xia, Tao Qin, Jianhuang Lai, Tie-Yan Liu, Exploiting Monolingual Data at Scale for Neural Machine Translation (In submission).
- Yiren Wang, **Lijun Wu**, Yingce Xia, Tao Qin, Chengxiang Zhai, Tie-Yan Liu, Transductive Ensemble Learning for Neural Machine Translation (In submission).
- Yang Fan, Fei Tian, **Lijun Wu**, Tao Qin, Xiang-Yang Li, Tie-Yan Liu, Searching Best Architectures for Neural Machine Translation (In submission).
- Hany Hassan, Anthony Aue, Chang Chen, Vishal Chowdhary, Jonathan Clark, Christian Federmann, Xuedong Huang, Marcin Junczys-Dowmunt, William Lewis, Mu Li, Shujie Liu, Tie-Yan Liu, Renqian Luo, Arul Menezes, Tao Qin, Frank Seide, Xu Tan, Fei Tian, **Lijun Wu**, Shuangzhi Wu, Yingce Xia, Dongdong Zhang, Zhirui Zhang, Ming Zhou, Achieving Human Parity on Automatic Chinese to English News Translation (Arxiv 2018, ***The first Chinese-to-English machine translation system that can match the human translation accuracy***).

EXPERIENCES

- Microsoft Research Asia — *Jan. 2019 to Present*
  Machine Learning Group ◇ Research Intern — Mentor: Tao Qin
- Microsoft Research Asia — *Jun. 2016 to Oct. 2018*
  Machine Learning Group ◇ Research Intern — Mentor: Tao Qin
- Microsoft Research Asia — *Jul. 2014 to Jul. 2015*
  Artificial Intelligence Group ◇ Research Intern — Mentor: Tie-Yan Liu

HONORS & AWARDS

1. 1st Place of WMT 2019 machine translation competition in 5 translations — *2019*
2. Microsoft Research Asia Ph.D. Fellowship — *2018*
3. Graduate Student National Scholarship — *2018*
4. Stars of Tomorrow Internship Award of Microsoft Research Asia — *2018*
5. Outstanding Graduate Awards — *2015*
6. 1st Place of IBM/IEEE Smarter Planet Challenge — *2013*
7. Undergraduate Student National Scholarship — *2012, 2013*
8. First Class Scholarship — *2012, 2013, 2014*

PROJECTS

WMT 2019 Machine Translation Competition *Feb. 2019 to Mar. 2019*

☞ Our team participate in the WMT 2019 machine translation competition in 11 translation directions, and we obtain 1st place in 8 translations and 2nd place in other 3 translations. Specifically, I participate in 5 translations: English-German, German-English, German-French, French-German and Russian-English, and we achieve ***1st place in all the 5 translation directions, with more than 1.0 BLEU better than 2nd in the first four translations***. I am the main member in this project, I contribute data filtering, data usage in a scientific way, transdctive distillation technology, soft contextual argumentation technology, multi-agent dual learning technology and experiment running in the project.

Human Parity Neural Machine Translation *Oct. 2017 to Mar. 2018*

☞ *Neural Machine Translation* (NMT) is proven to significantly outperform traditional translation techniques. To further improve the accuracies of NMT, we explore different structures (deep models, deliberation networks, efficient group network), attention mechanism design (word attention), training loss (sequence level loss), that can boost the performances of NMT from various aspects. ***Specifically, our system firstly matches the human translation accuracy in Chinese-to-English machine translation in Mar. 2018***. I am one of the main contributor of this project, including algorithm design, system implementation and working on experiments.

ChatMate/Chinese Idiom Solitaire *Jan. 2015 to June. 2015*

☞ We build an internal *ChatMate* system to company children and help with their studies. The system integrates complex rule-based methods to retrieve responses, together with deep learning based methods such as word embeddings. During the development, we implement the chinese idiom solitaire game component and successfully transferred this feature to *XiaoIce* team. I contribute this feature and play as a main contributor in this system.

PROGRAMMING SKILLS

1. Programming Languages: Python, C++, LaTeX
2. Deep Learning Tools: Theano, Tensorflow, Pytorch
